Election/Restrictions

Since an embodiment of the originally elected species, a battery with a lithium anode having a conductive layer associated with the anode surface, has been found to be allowable, applicants' claims have been amended to be commensurate in scope with the elected species. The restriction requirement mailed 08 May 2003 is maintained.

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jason Oakton on 29 December 2003.

The application has been amended as follows:

Please cancel claims 127-140, 143, 145, 148-151, and 159-178.

Please amend claim 147:

In lines 2 and 3, delete --negative electrode-- and replace with "lithium or lithium compound"

The following is an examiner's statement of reasons for allowance: The prior art fails to suggest lithium or lithium compound electrode active materials coated with a layer of carbon fibers as claimed. Although lithium electrodes coated with electrically

Art Unit: 1745

conductive materials have been claimed, the prior art provides no suggestion to use a carbon fiber coating with a surface area of $10 \text{ m}^2/\text{g}$ and a void volume of at least 50% as the coating.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
